March 30, 2017

#	Description	Suggested Corrections
1	Events page shows student ids instead of student email	Fetch the email instead of the id from database
2	Dashboard View details button does nothing	Change redirection to manageCourses page
3	Page not found does not redirect to designated "notfound.html"	Fix path redirection settings
4	Dashboard Add Courses goes to not permitted	Change redirection to manageCourses page
5	Dashboard Events section shows json of the event and not just the name (two objects)	Fetch only the name of the event instead of the entire json
6	Course Students shows student document ids instead of student emails	Fetch the email instead of the id
7	Dashboard says "Join 0 existing classes"	Add function to return the number of classes currently existing
8	Events Page you can't un-RSVP from event	Add function to delete user from attendees list when they remove RSVP
9	Dashboard posts don't show up and instead its 1 post that says "No posts yet!"	Add function to fetch posts from classes users joined and display them on dashboard
10	Join a course multiple times	Add a function to forbid users for joining a class multiple times
11	Not be able to leave a course	Add a function to delete user from the courses
12	Be able to create a course with a coursename space	Add a function to forbid spaces in course names
13	Both when and where return the same value	Fetch the correct corresponding

		information
14	Subgroup json is posted instead of subgroup name	Fetch only the name of the subgroup instead of the entire json
15	Subgroup Chat is functional but it is course chat room not subgroups chat room.	Fix chat function in subgroups
16	Two subgroups can have the same name in the same course	Add function to forbid creating duplicate subgroups in the same course
17	Subgroups on Dashboard is never populated.	Pass in a user's subgroup information and parse it to show all joined subgroups
18	Sidebar on Subgroups page never populates	Pass in a user's added course information and parse it to show all subscribed courses
19	Logout button does not logout a user	Fix logout function with redirection
20	Events cancel button does not reset form	Add reset functionality that deletes all users' inputs in the fields
21	Subgroups cancel button logs user out	Add functionality to button that clears the form with no logout functionality
22	All posts on Course Page show up in one line	Parse the posts returned from the database into separate objects
23	Users can RSVP multiple times	No checks for if a user is already stored in the database as an attendee
24	Subgroup page not having course information in navigation bar.	Add users' course information to the subgroup page
25	User name on Dashboard is displayed as the data object	Return a user's specific data into the object type and parse out their name to display
